REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose or fairly suggest a method for selectively catalyzing gas phase exothermic and endothermic reactions using a catalyst pellet having the average cross-section area of less than 30%, wherein the cross-section is substantially parallelogram-shaped, and in combination with the requirement of other properties of the catalyst pellet as recited in claims 37 & 70.

The instant claims are read in light of the specification and the claimed average cross-section area and other properties of the claimed catalyst pellet provides for a differ pressure drop when using the claimed catalyst pellet in the process of catalyzing the gas phase reactions (see specification page 15, Table 3).

There is no motivation to combine the teachings of the references together.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. Claims 37-70 are pending. Claims 37-70 are allowed.
